FACTORY DIRECT

U.S. Buildings delivers the most advanced, state-of-the-art clearspan protective building in the world today. U.S. Buildings' broad line of arch-type steel buildings are manufactured at a state-of-the-art facility in Boone, North Carolina.

What Factory Direct Means to You ...

Whether you're an individual seeking to build your dream workshop or a major corporation in need of additional space, our factory direct approach means big savings for you. When you buy from U.S. Buildings you're not only purchasing the best arch-type buildings money can buy, you're getting the best technology and the best minds in the business to back-up your investment.

All U.S. Buildings are made at the 50,000 square foot high-tech manufacturing center featuring a fully automated, and computer aided manufacturing line. U.S. Buildings are made with precision standards from the finest heavy grade commercial steel available in the world.

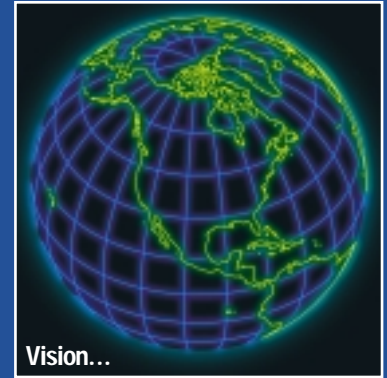

Whatever your requirements are for a steel building, we offer a proven product that has been thoroughly researched and rigorously tested by independent labs. Our American company has a long tradition of excellence, leadership, and value.

STEELsatisfied... A Unique Approach to Customer Service

It begins the first time you call U.S. Buildings. You will speak directly with a building consultant. They will review your specifications and respond with a tailor-made recommendation. From that moment on - to long after your U.S. Building is in place - your complete and lasting satisfaction with our product and service will be our #1 priority.

The Proven Strength of Steel and The Lasting Value of a Great Price

We deliver thousands of factory direct buildings around the world each year. We are dedicated to building the industry's highest quality, most economical structures - while guaranteeing you the best service in our industry.

We look forward to the future with great expectations for the continued growth and success of U.S. Buildings. We understand that to remain competitive we must do our very best everyday. We must challenge our employees and inspire them to excel. We must ensure the absolute best quality and affordability of our product line. And, we must always remember that a satisfied U.S. Buildings' customer is our most important asset. As we have done in the past, we will continue to invest heavily in groundbreaking research, expert manpower, and technology. Our dedicated vision is to take U.S. Buildings through the 21st century and beyond as a company built on tradition, strengthened by technology, and enhanced by the quality of our people.

Huey Reams needed a building that could give him maximum use of space, a humidity-free environment and tight security. U.S. Buildings delivered all three, plus a whole lot more!

CLEARSPAN DESIGN

The Benefits of Clearspan Design are Unmatched.

- 100% Usable Space for Your Money
- No Beams, Posts or Trusses
- Easy Construction
- Maximum Efficiency
- Improved Ventilation and Air Flow
- Ease of Insulation
- Lower Heating Costs

Put Our Legendary Arch to Work for You

U.S. Buildings are made of the toughest arch in existence. It has proven time and time again to be rugged and dependable even under the most extreme weather conditions. Designed with a deep corrugated panel, each arch measuring approximately 2' wide, and is manufactured to the strictest quality control standards in the industry.

Our Precision Overlap Ensures a Perfect Fit

The precision overlap of the arches places more steel at every critical connection, ensuring the strongest, best fitting arch system available.

In fact, the structure of a U.S. Building is unparalleled for strength, fit, and durability. Every U.S. Building is constructed with a 9" overlap, rather than the standard 4" design.

Double-Bolted for a Stronger Bond

The flat overlap features a double row of bolts. This tough construction creates a more durable structure that is virtually weather tight. In addition, our legendary precision fit makes for fast, accurate construction, saving you time and money.

One Tough Bolt

At U.S. Buildings we take great pride in the overall quality of our product. A perfect example of this commitment is the high caliber of our bolts. Every bolt comes with a recessed neoprene washer for a virtually airtight seal. At a minimum, these tough bolts are designed to withstand a 500-hour rigorous salt spray test, setting the standard for lasting quality.

Strength, versatility and technology are the hallmarks of U.S. Buildings. Call now and see for yourself why our arch-type steel buildings are the perfect choice for homes, farms, back-yard shops and industry around the world.

Tom Arceneaux always wanted a workshop and the room to store his toys. Now he has one right outside his own back door. For Tom and thousand of others, nothing but a U.S. Building will do.

SHOPS & GARAGES

We Invented The Dream Workshop You Deserve.

U.S. Buildings' founders sold the original gabled roof steel building in 1992. While there have been numerous attempts to imitate this design, make no mistake, our building is still America's ultimate back-yard workshop.

Custom End Walls Are an Attractive Option

One unique feature of our buildings is the customers ability to customize their own endwalls and save thousands of dollars. You can even match your home and complement your existing surroundings. Plus, you can expand your building at any time – without construction hassles or major expenses.

Whether your dream is to have your own woodworking shop, a free-standing garage and workspace, or space to operate your auto mechanic shop, U.S. Buildings is the preferred choice of thousands of Americans, coast-to-coast.

This popular design features straight sided walls and a pitched style roof. This model is easy to assemble, spacious, and able to withstand strong wind and snow, yet is still very affordable.

- With 100% usable space there is no limit to what you can do.
- Our buildings have a reputation for being ultra-tough. In fact, they have survived some of the fiercest hurricanes of the century, including: Andrew, Hugo, and Georges. That's the kind of strength your dream workshop deserves. That's peace-of-mind!
- U.S. Buildings are proven to add resale value to your property.
- Customizing end walls expands your ability to match your home and blend your building in to your neighborhood surroundings.
- With U.S. Buildings' Steel Credit financing you can purchase your dream workshop for an affordable low monthly payment.
- With the best customer service in the business you know professional assistance is as close as your telephone - and it's toll-free.

Call Today (800) 991-9251

Build Arches

Raise Arches

Add End Walls

1 Build Arches

Most of the work is done on the ground, making the assembly of your U.S. Buildings safe and easy.

2 Raise Arches

In the majority of cases there is no heavy equipment required to raise your building. You'll enjoy fast and accurate assembly because of our precision made arches which fit perfectly and overlap easily.

3 Add End Walls

U.S. Buildings' pre-cut, pre-drilled end panels are easy to install and include unique features such as: weather strip inserts and heavy-duty curved angles for a guaranteed custom fit.

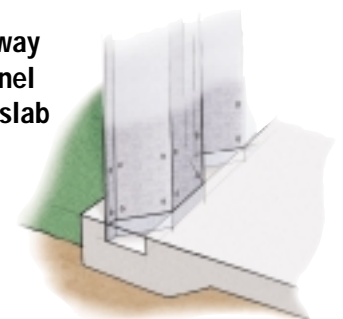

Simple Foundations

- Both are simple and economical. Ask your Building Consultant what foundation is right for you.

STEELsatisfied

CUSTOMER SERVICE PROGRAM

The U.S. Buildings commitment to quality customer service is exemplified by our STEELsatisfied program. We are continually finding improved ways to research, design and manufacture our buildings, as well as service the people who buy them.

Customer satisfaction and recognized excellence of product made us #1. Our on-going mission is to always be the industry leader - setting the standard in quality.

Out here on the farm my day starts early and ends late. So when I called U.S. Buildings' toll-free 800 number it was

late at night. But they answered my call and, most importantly, demonstrated the kind of service that made me feel comfortable with my purchase of a clearspan building right from the start.

T.M. - Wichita Falls, Texas

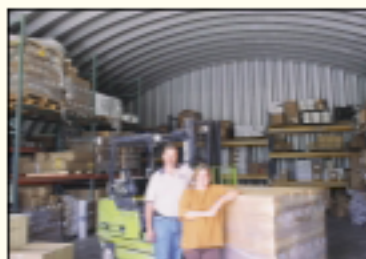

We owe a debt of appreciation to U.S. Buildings. You see, my wife and I are in our mid 70's and weren't sure we could build our dream workshop by ourselves. But

we did! Thanks to the help and guidance of the nice folks in the U.S. Buildings' customer service department.

B.K. - Canton, Ohio

We looked at a bunch of ads, even checked some websites, U.S. Buildings was the best value for our money and had the best customer service policy by far!

S.P. - Marietta, Georgia

I always wanted a backyard workshop. But I thought the cost of materials and construction would be too costly. But when a friend referred me to U.S.

Buildings, I discovered I could afford my workshop even build it myself. Plus, the people at the U.S. Buildings' factory were really helpful!

M.R. - Heppner, Oregon
